CLAIMS

	I claim:
1	1. A vehicle comprising:
2	an engine compartment located at an outer rear corner of said vehicle, said
3	engine compartment being formed by a hull wall, said engine compartment being oper
4	on at least one side; such that
5	an engine contained in said engine compartment is accessible from outside o
6	said vehicle, and
7	said engine compartment is separated from a personnel area by said hull wall
8	thereby shielding a crew of said vehicle from said engine.
1	2. The vehicle as defined in claim 1 wherein:
2	said engine compartment is covered by an access door.
1	3. The vehicle as defined in claim 1 wherein:
2	said engine compartment is open on both a lateral side and a rear side.
1	4. The vehicle as defined in claim 1 wherein:
2	said engine is a turbine engine that drives an electrical generator.
•	
1	5. The vehicle as defined in claim 1 wherein:
2	said engine is installed in a vertical orientation, thereby reducing an amount of

- 3 space required for said engine in said vehicle.
- 1 6. The vehicle as defined in claim 1 wherein:
- said vehicle further comprises a second compartment located at a second outer rear corner of said vehicle, said second compartment being formed by a hull wall, and said second compartment being open on at least one side.
- 7. The vehicle as defined in claim 6 wherein:
- 2 said second compartment is covered by a second access door.
- 1 8. The vehicle as defined in claim 6 wherein:
- said second compartment is open on both a lateral side and a rear side.
